Print onto white card. Cut out the watch carefully.
Go through the sounds with the child and ask them to write the letters carefully following the direction of the arrows. Blend the first sound with the sounds in the middle to make a word. Ask the child to put their finger on the first sound as they say it and then use the sound buttons for the two letters in the middle. Discuss whether it is a real word or a made up word.
Fasten the watch to the child's wrist and the child can practise blending throughout the day and when they get home.
