

CLIMATE CHANGE

Deforestation

"The action of clearing a wide area of trees"

Main causes

Main consequences.

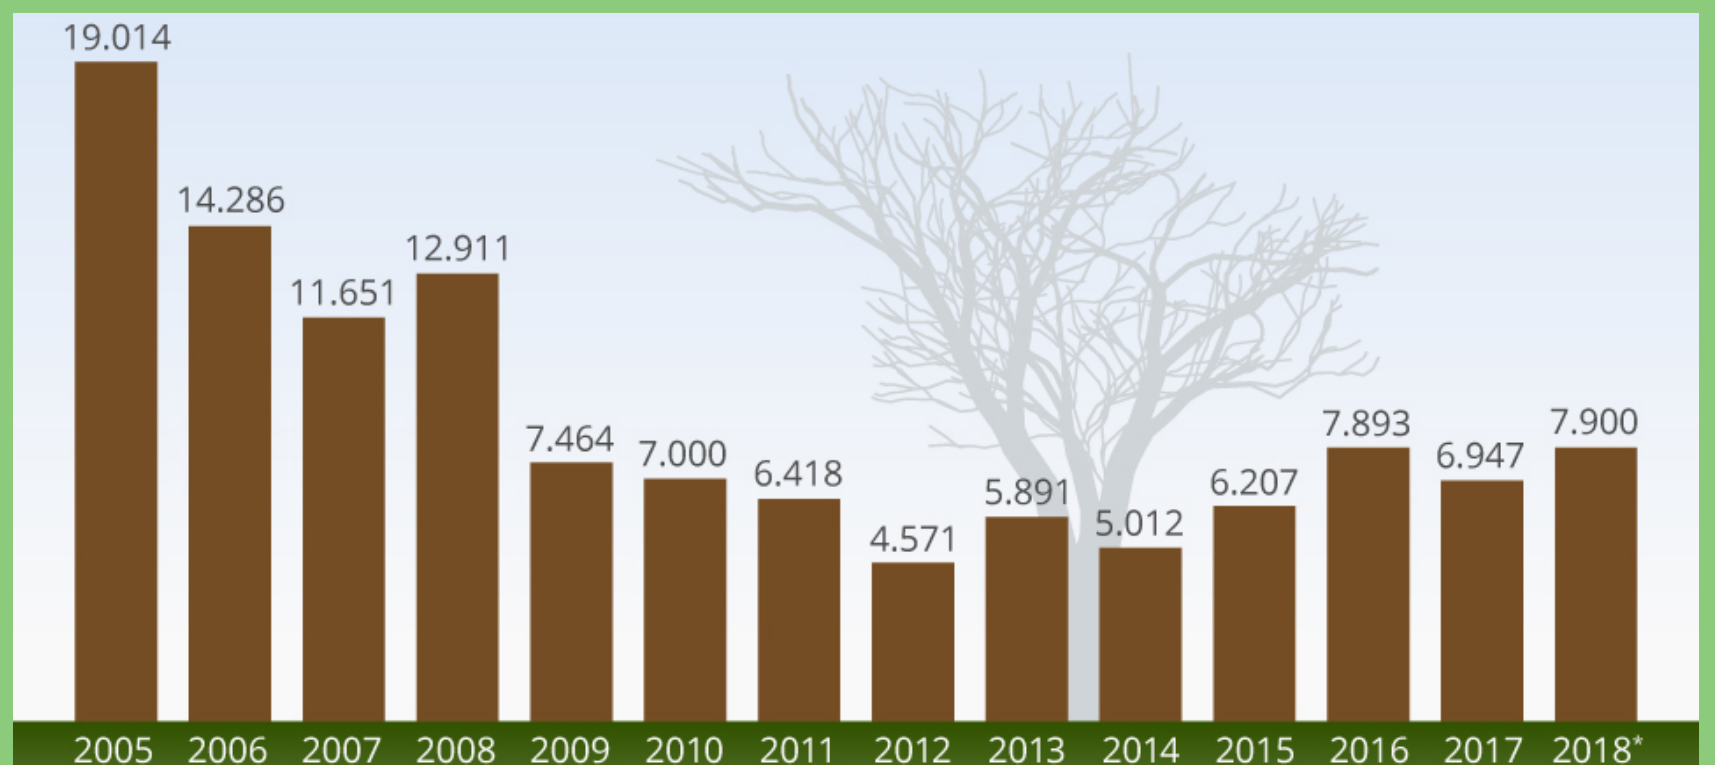

- Global warming
- Pollution
- Droughts
- Desertification
- Shortage of food
- Wildlife affected.
- Flooding of rivers

Damaged surface in the Amazon forest.

Wildlife affected

This century 150,000 orangutans died because of the insane palm oil's production. Their machines are destroying the forests and animals' life.

Ways to stop it

- The use of recycled paper, ebooks, renewable containers.
- Reduce our consumption of meat.
- Buy wood products with the FSC certificate.
- Recycling.

"There is no planet B"
