

EL CICLO DEL AGUA

3º EDUCACIÓN PRIMARIA

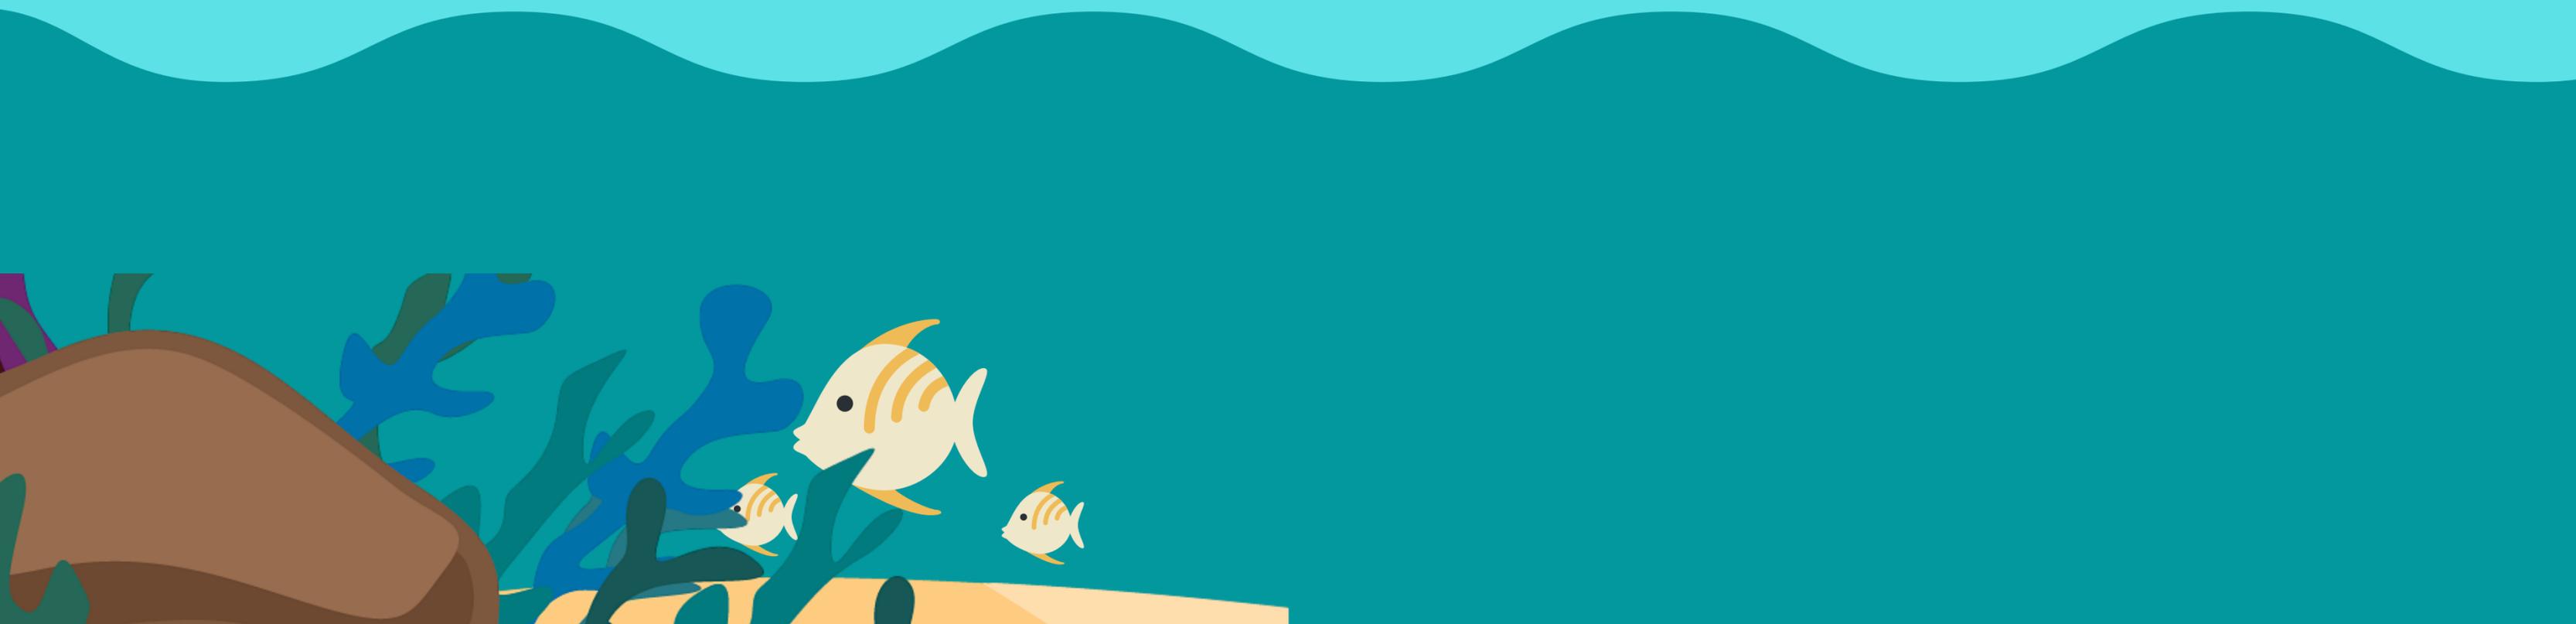

EVAPORACIÓN

EL SOL CALIENTA LA SUPERFICIE DE LAS AGUAS Y TRANSFORMAN EN VAPOR, SUBIENDO A LA ATMÓSFERA.

CONDENSACIÓN

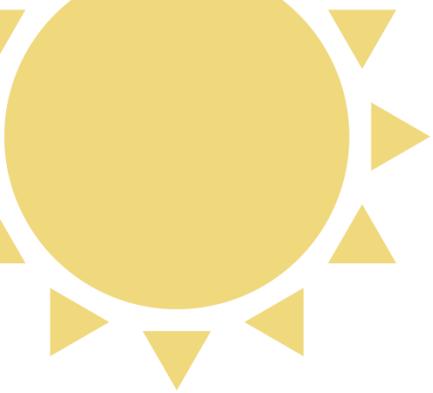

EL VAPOR DE AGUA SE ENFRÍA Y FORMARÁ LAS NUBES.

The background features a tropical landscape with several grey, stylized clouds. Some clouds have yellow lightning bolts. Blue raindrops are falling from the clouds. On the left, there are two green palm trees; one has a toucan perched on it, and a small green turtle is visible near the base. On the right, another palm tree is shown. The bottom of the image has a dark teal ground area with a small red crab on the right and two large yellow circular shapes on the left and right. The title 'PRECIPITACIÓN' is centered in a large, bold, dark blue font.

PRECIPITACIÓN

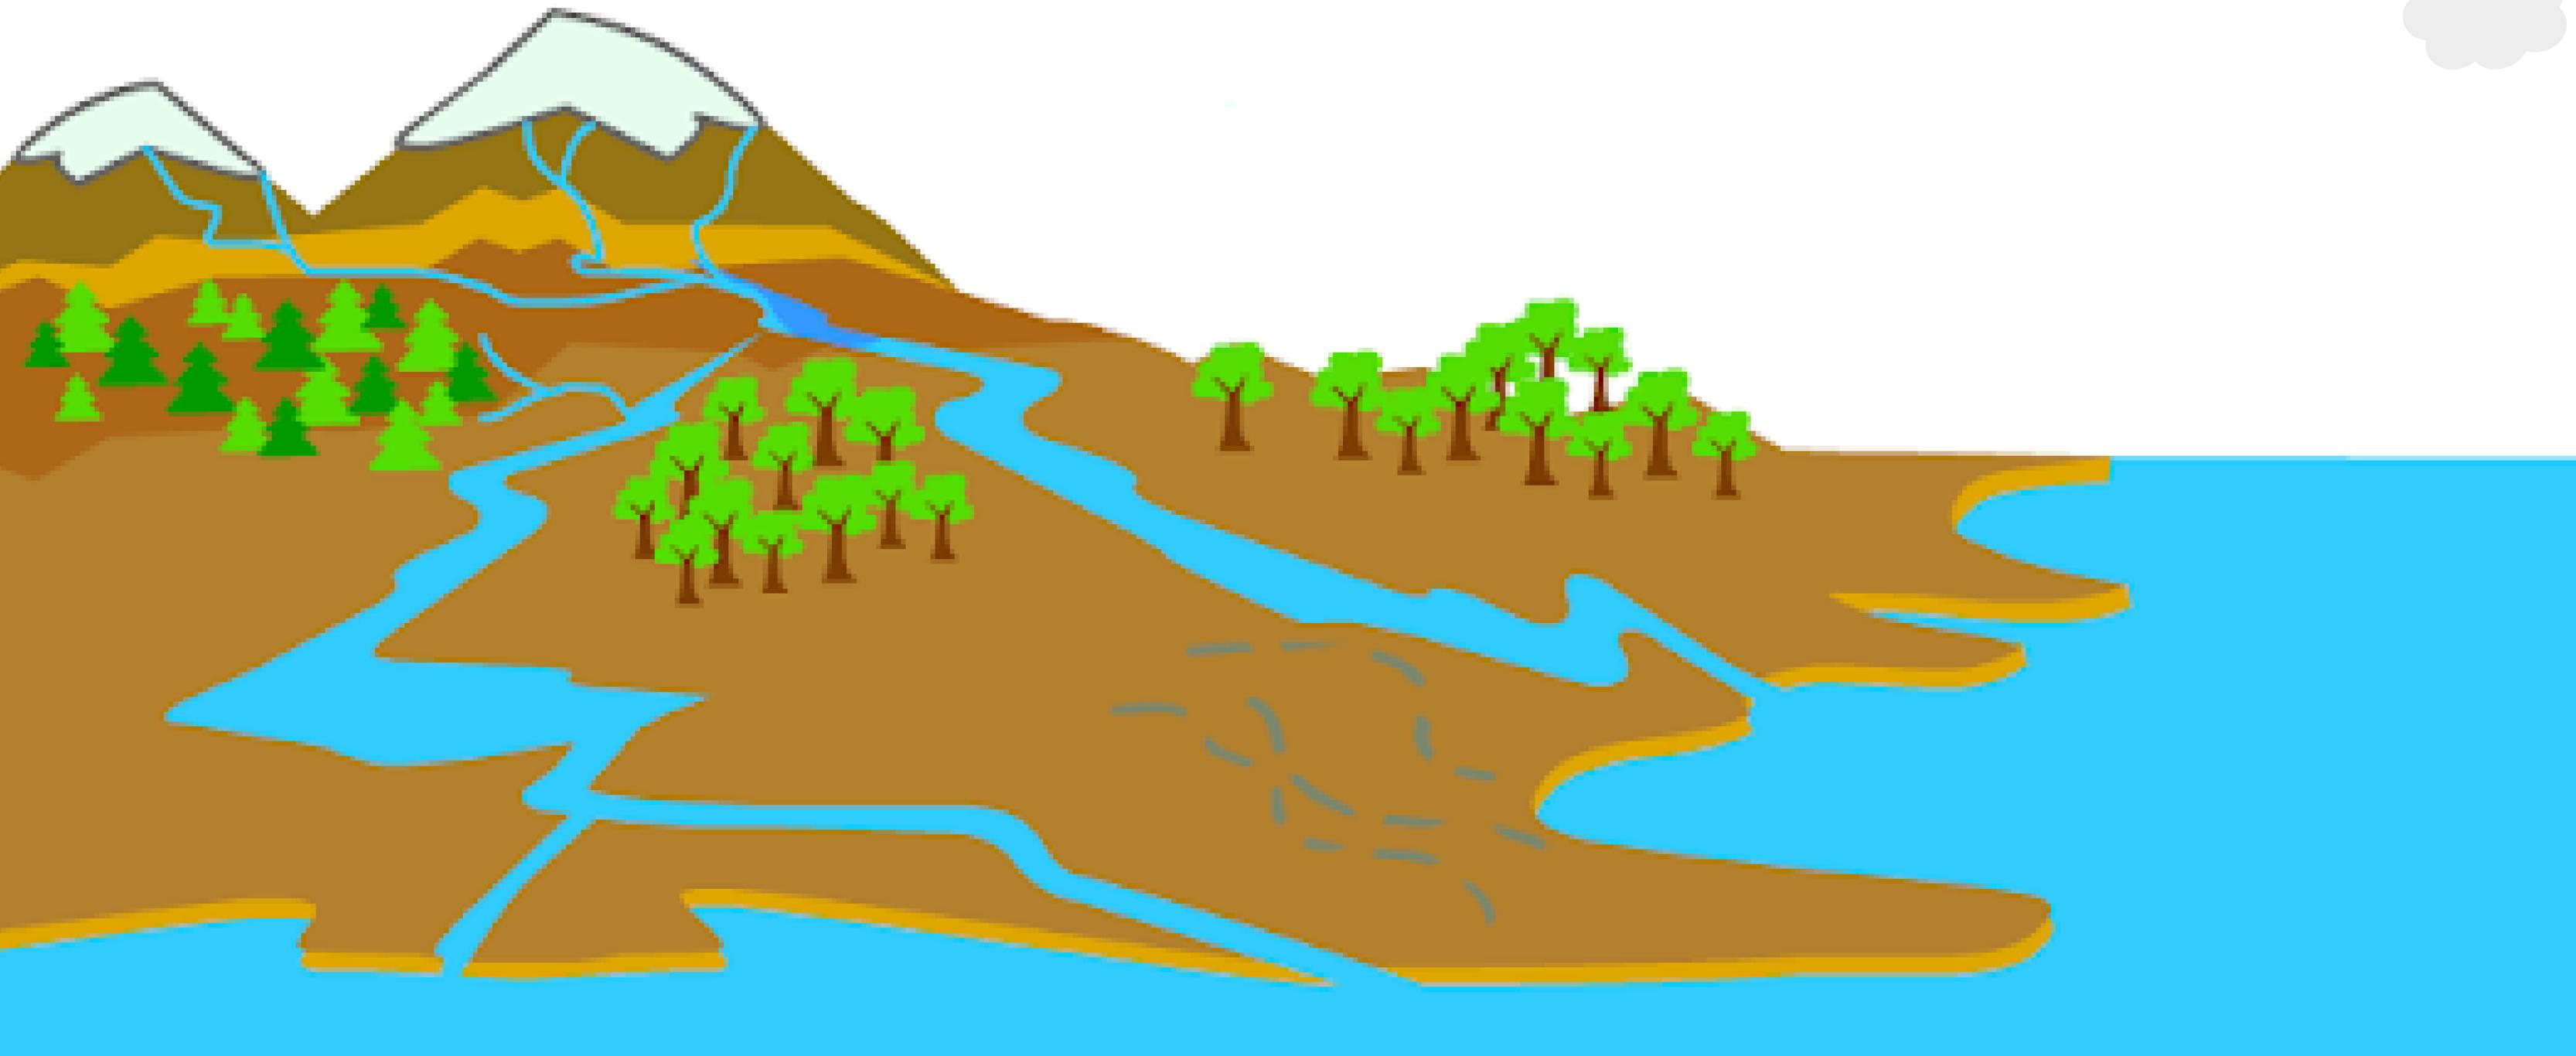

EL AGUA CAE EN FORMA DE LLUVIA, NIEVE O GRANIZO

FILTRACIÓN

EL AGUA SE FILTRA HACIA LA TIERRA, LOS RÍOS, EL MAR O EL OCÉANO

**UNA VEZ MÁS, TODO
VUELVE A EMPEZAR**
